Not all patients with a chronic condition will need assistance through the ITC program.

When referring patients, GPs should give priority to patients most in need of care coordination services to obtain improved health outcomes. As a guide, patients most likely to benefit from the ITC Program include:

- Patients who are at greatest risk of experiencing otherwise avoidable (lengthy and/or frequent) hospital admissions
- Patients at risk of inappropriate use of services, such as hospital emergency presentations
- Patients not using community based services appropriately or at all
- Patients who need help to overcome barriers to access services. This includes financial barriers.

HealthWISE requires a minimum of three weeks notice to be able to assist when travel/accommodation is requested

Please consider other Government funded programs to assist clients when not enough notice is provided or a client is not eligible for ITC; PTSS (QLD), IPTAAS (NSW), Care Goondiwindi and/or Meditrans

Please email ALL documents to itc.ddwm@healthwise.org.au
